## Kenya Women's Project: Mosquito Nets Saving Children's Lives

We've started a small project in coastal Mombasa, working with local Kenyan women living in poverty, struggling to live on \$1 a day. Malaria is endemic, killing thousands of babies & children each year & health care is only available if you can afford it. We aim to raise money to provide mosquito nets - and *teach the women to make them* - so they earn an income, and help save lives.
